

Arthur FILIPPI

MSc student at Ecole Polytechnique

+33 6 21 66 75 48

arthur.filippi@polytechnique.edu

PROFILE

Engineering student at Ecole Polytechnique with a strong foundation in applied mathematics and machine learning, driven by entrepreneurship. I want to build science-driven ventures at the frontier of artificial intelligence and biology, pairing rigorous state-of-the-art methods with real-world impact.

PROFESSIONAL EXPERIENCE

Global Advisory (M&A) Summer Analyst

Jun 2026 – Aug 2026

Rothschild & Co

Paris, France

- Focus on infrastructure, energy, and biotech M&A transactions. Advised a European ultra-fast charging-points operator on a €400m capital increase; advised a global energy leader on M&A targets in wastewater management.

CEO & Co-founder

Oct 2025 – May 2026

Stealth M&A startup

Paris, France

- Co-founded an AI B2B platform for M&A boutiques (target screening, due diligence, CRM), built an MVP, ran customer discovery. Did not reach product-market fit (concurrent commoditization of AI in finance) but learnt to build from real users' problems, to launch fast, to identify good moats, and that deep specialization is the best one.

President

Jun 2025 – present

Duo Conseil X-HEC

Palaiseau, France

- Joint consulting firm from engineering and business schools Polytechnique and HEC involving 60+ junior analysts.
- Providing companies with solutions in the fields of benchmarking, digital transformation, and data analysis.

Trainee Platoon Commander

Nov 2024 – Apr 2025

8th Marine Infantry Airborne Regiment

Castres, France

- Supervised the military training of 30+ new recruits and actively took part in commando training and parachuting.
- Developed my leadership, resilience, and teamwork skills through various pivot roles assumed over the instruction.

EDUCATION

Master of Science – “Cycle Ingénieur Polytechnicien” (4.0 GPA – entry rank: 4th)

2024 – 2028

Ecole Polytechnique (France's top-ranked engineering school)

Palaiseau, France

- Majoring in applied mathematics, stochastic processes, deep learning, computer science and data analysis.
- Specialising in 2026–2027 in advanced machine learning, immunology, computational biology and neuroscience.

Preparatory Class (4.0 GPA)

2022 – 2024

Lycée Sainte-Geneviève

Versailles, France

- Intensive preparation in theoretical physics and applied mathematics for entrance to leading engineering schools.

American High School Diploma (4.0 GPA, Honour Roll)

2018 – 2022

Academica Dual Diploma

Remote Learning Programme

- Majoring in US economics and US politics, while graduating as Valedictorian in French high school.

PAST AND CURRENT PROJECTS

ML Methods for Carbon Emissions Estimation

BNP Paribas Personal Finance

Jun 2025 – Jun 2026

- Developed an end-to-end state-of-the-art ML pipeline to estimate greenhouse-gas emissions linked to the bank's consumer-loans activity, deployed on a large-scale dataset (800k rows), presented results to the bank's Chairman.

Assessing the Global Impact of Deepfakes in Cyberwarfare

Entente Cordiale Day

Jun 2025 – Dec 2026

- Investigating current uses of deepfakes: modalities, deployment, similarities, strategic effects, and recurring flaws.
- Analysing their impact on civilian populations and the applicability of a long-term and large-scale countermeasure.

HONOURS AND AWARDS

Clemenceau Prize (1st prize)

2025 – French Army Public Speaking Competition.

Concours Général – Literature Essay (3rd prize)

2021 – National Academic Competition.

National Mathematical Olympiad (runner-up)

2021 – National Academic Competition.

PROFESSIONAL SKILLS

MISCELLANEOUS

English: fluent

Programming: Python, Java, SQL

French: native speaker

PyTorch, Scikit-learn, Pandas

German: intermediate

High-dimensional data analysis

National Competitive Rowing (5+ years)

Polytechnique's Swimming & Skydiving teams

Co-founder of Polytechnique Start-Up Society
